

Completing Martha's Vineyard Network of Off-Road Bicycle Paths (SUPs)

The towns, MVC, and MassDOT are working to fill in 3 miles of missing gaps in the 37-mile network of Shared Use Paths, in order to link the three down-Island towns to each other and to the State Forest.

Having a continuous, off-road SUP network will provide the only viable bicycling option to reach many key destinations for the considerable portion of residents and visitors who aren't comfortable riding in the roadway of busy, congested roads, and would only ride their bikes in a physically separated off-road path.

The presence of this continuous, off-road SUP network would also be an asset for Martha's Vineyard's tourism and economy.
